Oracle Certified Master	AWS RDS / Aurora specialist	NZ / Auckland based	NDA ready	White-label friendly
-------------------------	-----------------------------	---------------------	-----------	----------------------

Executive summary

Principal-level database engineer with 15+ years across Oracle, PostgreSQL and AWS database services. Former AWS database support / technical account experience, with partner-friendly delivery through **Rijal Group** for contract, subcontract and advisory work across NZ and ANZ.

This external version is deliberately confidentiality-safe: it avoids customer identifiers, internal case counts, internal performance ratings and non-public support details while still showing the senior capability a partner needs to evaluate fit.

15+	OCM
Years enterprise database delivery	Oracle Certified Master
NZ	ANZ
GST registered - NDA ready	Remote / partner ready

Signature services for partners and enterprises

Oracle to PostgreSQL / Aurora migration Assessment, PL/SQL refactor strategy, AWS SCT/DMS planning, cutover design and post-migration optimisation.	Production PostgreSQL performance rescue Query tuning, vacuum/bloat remediation, replication triage, RCA and operational stabilisation.
AWS database operations RDS, Aurora, DMS, DocumentDB, RDS Proxy, CloudWatch and Performance Insights support patterns.	HA/DR architecture and audit Multi-AZ, Global Database, RTO/RPO planning, failover readiness and written audit outputs.
Pre-sales technical authority Solution shaping, estimation, delivery risk review and architecture defence in client workshops.	AI-SDLC delivery AI-assisted runbooks, RCA documentation, technical specs and repeatable delivery workflows.

Signature delivery proof

PostgreSQL Performance Rescue

A high-pressure production tuning engagement reduced an extreme long-running query to a practical runtime window using safe diagnosis, SQL tuning and rollback-aware delivery.

Ideal for: performance firefighting, executive escalation, migration blockers and partner delivery risk.

Engagement options

- Named subcontractor or white-label delivery
- Day-rate, fixed-scope or monthly advisory retainer
- Pre-sales, project delivery, escalation and post-incident review
- Partner-friendly non-solicit and NDA-ready terms

Evidence for partner due diligence

A concise, external-safe view of career depth, credentials, technologies and the practical ways **Rijal Group** can support consulting partners and enterprise teams.

Career highlights

Organisation	Period	Relevant delivery depth
Amazon Web Services	2022-2026	Technical Account Manager / Cloud Support Engineer - Databases. RDS, Aurora, DMS, RDS Oracle, PostgreSQL and enterprise database support patterns.
Cognizant Servian	2021-2022	Senior Oracle Consultant. NZ government and banking migration assessments, HA/DR architecture and cloud transition planning.
Altis Consulting	2019-2021	Managed services analyst and DBA. SQL Server Always On, Azure SQL, SSIS/ADF and production data pipeline support.
Nexperia / NXP	2013-2019	Oracle RAC, Exadata, SharePlex replication, cross-country database operations and BI platform support across Malaysia and Thailand.
AXA / earlier roles	2009-2017	Oracle DBA roles across insurance and enterprise platforms: RAC, Data Guard, backup/recovery and performance tuning.

Credentials & recognition

- Oracle Certified Master - Oracle Database 11g
- Oracle Cloud Architect Professional
- Master of Information Technology (Honours), AUT Auckland
- Servian Rockstar Rookie 2021
- Extensive AWS database services experience across RDS, Aurora, DMS and PostgreSQL support patterns

AWS: RDS PostgreSQL, Aurora PostgreSQL/MySQL, RDS Oracle, DMS, SCT, DocumentDB, RDS Proxy, CloudWatch, Performance Insights, EC2, S3, IAM, KMS.

Oracle: RAC, Data Guard, GoldenGate, Exadata, ASM, RMAN, OEM, PL/SQL, 11g-23ai.

PostgreSQL: pg_stat_*, autovacuum tuning, logical replication, pgbouncer, pgAnalyze, pgAudit, PostGIS.
Delivery: Terraform, Ansible, Linux, Python, Bash, ITIL, Agile/Scrum, AI-assisted documentation.

How partners use Dipak

Bid / tender support

Review database scope, risk, estimates and architecture so pursuit teams sound senior and credible.

Delivery rescue

Join during incidents, migration delays or performance regressions where senior database judgement is required.

White-label senior specialist

Operate under the partner brand for client-facing work with NDA and standard non-solicit expectations.

Retainer backup

Provide L3/L4 database backup for RDS, Aurora, Oracle, PostgreSQL, DMS and production support teams.

Public-safe statement

This capability statement is intended for external partner due diligence. It avoids non-public AWS customer identifiers, internal case counts, internal performance ratings and confidential support details.
